## About This Content

The Earth Defense Force has been defeated, and after centuries of oppression, Mars is finally free. For a time, there was peace. Yet from the forgotten ashes rose Adam Hale, scarred from years of struggle, seeking ultimate revenge against the Red Faction. His target, the one thing that keeps the surface of Mars habitable for thousands of colonists, is the Terraformer. Relive the battle for the Terraformer through four incredible new missions featuring aerial flyers, orbital strikes, and the Red Faction armored surface tank. Unlock two destructive new weapons, the Sharpshooter Gun and Shard Cannon, while earning ten new achievements in this thrilling new mission pack for Red Faction: Armageddon!

Very good hidden object game.

Nice graphics, good story, good drops of originality, long enough.

Nice piece of work.. why be with your waifu when you can BE YOUR WAIFU ????. Great game, love the concept

I got this during the 2017 summer sale for about \$6

Definitely worth the price there

The only thing is that the gameplay can become a little stale after a while

You are constantly doing the same thing every mission. Hopefully the devs change some things up

But overall good game!. Totally Amazing!!! Half Life 2, like it's predecessor, is one of those classic games that words fail to describe. It worth every single cent, but you better purchase it on a bundle with the whole series. Highly recommended for everyone, especially for people of good taste, that can appreciate this old time classic gem of an era never to return.... Haunted House isn't terrible but it's not good either. It dosen't know if it wants to go after the kids demographic, or the adults who actually remember the original. It's also not sure how to update the gameplay. It's not bad but it's not great.

<https://youtu.be/VqE5YcWTK7GI>. First off let me say that the game runs flawlessly. I read reviews before getting far in the game and Disabled Cloud Saving as well as downloading that quick and simple ram patch for the game (read reviews). It took about 2 seconds and i have had absolutely no issues whatsoever and am loving the game ( coming from FF13).

My Specs:

GTX1080

32 GB Ram

Intel I7 8700

Running on an SSD

Get the game, disable cloud saving, and download the ram patch, you should have no issues with a decent cpu. Enjoy <3.

sweet...

. Thank you for this game.. This game does not work.

My friend is not listed in it and he has this game too...

I wanted to play with him but couldn't because he isn't in it.

Please fix.. ALL HAIL THE MIGHTY DUCKLORD!!

For those of you who have played and enjoyed "Princess Remedy in a World of Hurt," you already have reason to get this.

For those who have not, go play the first one. IT IS FREE ON STEAM.

Then come back here when you're done. I know you'll be back in like, an hour tops, sure, but trust me on this.

THIS GAME IS WORTH ITS COST.

I mean, sure, it's more of the same, but with some nice new things to keep it all fresh, and you can date Frallan/Ducklord, so I mean, it's great. Plus you get flask abilities now, which is really cool.

So yeah, this game is worth. Get it!. How to put it...

They have a \u2665\u2665\u2665\u2665 on first screen. 3rd screenshot.. Like gangbeast without arms so basically throwing props at each other ranging from chairs, skids, cars (YES I SAID CARS), book shelves and MANY MORE, really fun its early access so dont get mad if you get errors or crashes etc :) and kids can play it :tabbycat: , I played a full half hour and it was making me giggle cause the camera is dramatic almost like a third person kill cam when its the last prop hit on a player which made me laugh quite hard only its worth your time if you have some friends too cause its really quick to load and does not need a super computer but still looks nice and has bloom and some other options which never come with first releases of games and sometimes the AI trips over a prop and dies and the camera is dramatic just give it a go :redbat:
